A substantial custom-built door for your porch

Every Xtend entry door is built to fit your opening and coordinate with your Xtend porch windows. The complete prehung door arrives assembled and ready to install.

INCLUDED WITH EACH DOOR

- **Complete prehung door and frame**
  The door is mounted in its matching frame and arrives assembled and ready to place in the opening.
- **1-inch mounting flange**
  A flat, predrilled mounting flange extends around all four sides and may remain visible or be covered with trim.
- **Your choice of window insert**
  Choose an Xtend vertical 4-track window with an exterior screen or a framed fixed tempered-glass panel. A pet screen is optional with the 4-track window. Door handle is installed on-site. The window insert color matches the door frame color.
- **Lockable handle and heavy-duty hinges**
  The lockable handle and hinges are available in Black or Silver.
- **Brushed aluminum threshold**
  The attached threshold is designed to sit on top of the finished flooring or butt against it.
- **Custom powder-coated finish**
  The door, frame are finished to coordinate with Xtend windows in Black, Brown, Tan, or White.

INCLUDED WITH EACH ORDER

- **Installation screws**
  We provide the correct screws for installation into wood-based framing or metal, based on needs.
- **Lexel sealant**
  Clear sealant is supplied for sealing behind flange during installation per instructions.
- **Installation support**
  Instructions and direct technical support are available for homeowners and contractors.

NOT INCLUDED

- **Automatic door closer and pet door**
  Door closers and pet doors are not available.

HOW THE DOOR IS MADE

- **2-inch-thick door**
  The substantial 2-inch door has aluminum stiles and rails approximately 5 inches wide.
- **Powder-coated aluminum**
  Durable, low-maintenance aluminum construction that coordinates with Xtend windows.
- **Assembled in Minnesota**
  The door is assembled, hung, adjusted, and checked in Minnesota before it ships.
- **Built as a single door**
  Double-door configurations are not available.

SIZES AND OPTIONS

- **Standard 36 x 80-inch door**
  The actual outside frame size is 35 3/4 inches wide by 79 3/4 inches tall.
- **Custom sizes up to 42 x 96 inches**
  As an upgrade, the door can be custom-made for openings up to 42 inches wide and 96 inches tall.
- **Swing and hinge options**
  Choose in-swing or out-swing with the hinges on the left or right, as viewed from the exterior.
- **Taller openings**
  A fixed tempered-glass transom can be installed above the door in separate framing.

PLANNING FOR INSTALLATION

- **A properly framed opening is required**
  Provide a flat, solid mounting surface at least 1 inch wide across the top and along both sides of the opening.
- **Doors are not part of a mull system**
  An Xtend door needs its own framed opening and cannot be joined to windows. It is best practice to have a post on each side of the door.

Warranty and service

Xtend products include a lifetime warranty on the vinyl and frames. Screens are warranted to arrive in good condition.
